

## Hard Carry Case

**The case interior is made of foam plastic with cut-outs that house and protect the thermal camera and its accessories. The camera with its handle mounted can fit in the case.**

- Outer shell of the case is made of a hard black plastic.
- Shockproof .
- Lock does not burst open when the case is dropped.
- The case, which is entirely watertight, floats.
- Next to the case handle, there is a built-in valve that automatically regulates pressure, this makes sure the case is always easy to open.

**An alternative to the soft carry case.**

**Can be supplied with the camera using part number P7030/N or as an after-sale accessory. (Part Number P7030HC)**
