

Receiver Station and Kit

The Receiver Station is a PC based system that allows the viewing of the thermal image transmitted from the camera.

The Argus4 Remote Receiver Kit consists of:

- Network Adaptor
- Software
- User Manual
- PC Lead

The Remote Receiver Kit is supplied with PC software to enable the user to view digital streaming video from an Argus4 camera on to a PC of their choice.

You may also use other compatible media players to view the data stream if they wish.

The Argus4 Remote Receiver Station is a ready configured set of parts to allow the reception of Wi-Fi transmissions from an Argus4 camera straight from the box.

Items supplied are:

- Mobile PC
- Pre-loaded software
- Network adaptor
- User manual

WARRANTY

The P7030RKT and P7030RRS are provided with the manufacturers' warranty intact.
